

Git Commands

See current status of working files and repository

Run this after every command to see what has changed and what hasn't:

git status

Pull New Exercise Code / Solution Code

Run this command to download any work your instructor has made available:

git pull upstream main

Push Exercise Code

Run the following three commands, in the exact order described, to push (upload) any work you've done:

git add -A

git commit -m "My commit message"

git push origin main
